

## Horns Review

A friend and I decided to watch this movie on a whim. I'll admit, due to the reviews from others I had my doubts about this one.

Horns is a movie that many said wasn't worth watching. I disagree with the masses on this one. What seemed like a dumb movie to many I found intriguing. One man finds horns growing from his forehead after the mysterious death of his girlfriend.

Starring Daniel Radcliffe (also known famously as Harry Potter) as the troubled Ig Perish, this movie shows the darkest side of humanity. The horns bring the people's darkest secrets to the surface. Can Ig use this new power from the horns to get to the bottom of his girlfriend's death?

The message from the horns and the suspense and mystery had me on the edge of my seat. I must also say I didn't see the tear jerking moment in the film. This movie was better than the reviews portrayed. I would watch this one again just for some of the comebacks from Radcliffe. In a way something so serious was made comical. This film had a little of everything; comedy, suspense and romance.
