

The Bone Collector Review

A killer leaves behind a puzzle that leads to the next victim. One crippled man and former homicide investigator, Lincoln Rhyme (Denzel Washington) may be the only one who can stop this deranged killer. But because he is crippled he needs some help from the field. He works with rookie cop, Amelia Donaghy (Angelina Jolie) to find the next victims and figure out the killer's clues.

Even confined to a bed, Washington still delivers a great performance as he cracks the killer's codes though he can never get one step ahead of the killer.

This also one of Jolie's better performances as she brings Donaghy to life and really gives her a personality. She doesn't take crap from a man who is used to getting his way and her character has depth as she faces her character faces her own personal battles as well.

This is one of the best suspense/thrillers I've seen to date. I rank this right up there with A Perfect Murder and Valentine. The movie keeps you guessing and you can't even guess the culprit until it's almost too late. I was on the edge of my seat and shocked by the turn of events.

Will Rhyme and Donaghy crack the killer's last code before he kills one of them?
